Roomlight Mammography Compact 18x24 cm (RMC/1F)

The **RMC** is also available in a “MINI” version.

The **RMC** uses the 18x24 cm cassette format only, but has the advantage of being significantly smaller and lighter than the full size unit.

The **RMC** maintains the same user friendly operating characteristics and has the same high reliability as the full size **RM**.

In addition, the **RMC** comes in two configurations, the “Processor Interface” and “Stand-Alone” version for even greater flexibility in conserving valuable floor space and ease of use.

The physical specification for the **RMC** are:

	Stand Alone	With Processor
Height:	54 cm (21 ¼ in.)	135 cm (53 in.)
Width:	57 cm (22 ½ in.)	75 cm (29 ½ in.)
Depth:	63,5 cm (25 in.)	117,5 cm (46 ½ in.)
